

BALANCE NETWORK TOKEN

1- INTRODUCTION

Balance Network is a blockchain platform that provides users with a comprehensive suite of applications in one place. The platform is built on the BNB Chain and offers a centralized exchange, a DEX, an NFT marketplace, a launchpad, and multi-chain wallet. The platform is designed to be user-friendly and offers a seamless experience for users.

2- PLATFORM FEATURES

Balance Network offers a wide range of features to its users. These include:

Centralized Exchange: Balance Network's centralized exchange allows users to trade a variety of cryptocurrencies. The exchange is designed to be easy to use and offers low fees while offering advanced trading features such as limit-market orders, stop-loss orders, and margin trading. The CEX is regulated and compliant with global standards to ensure a safe and transparent trading environment for users.

Decentralized Exchange: The DEX on Balance Network is built on a decentralized infrastructure that allows for trustful peer-to-peer transactions without the need for intermediaries. It leverages an automated market maker (AMM) model to enable users to swap tokens with minimal slippage. The DEX on Balance Network is designed to be fast, secure, and efficient, and it supports a wide range of tokens and trading pairs.

DeFi-Protocols: Balance Network offers a range of DeFi-protocols that allow users to earn interest on their BLN tokens. The protocols include liquidity pools, yield farming, and more.

NFT Marketplace: The NFT marketplace enables users to buy, sell, and trade unique digital collectibles. It leverages blockchain technology to ensure the authenticity and ownership of these assets, enabling users to trade them securely and transparently.

Launchpad: Launchpad allows new projects to raise funds and launch their tokens on the platform. The launchpad within Balance Network designed to provide a seamless and secure fundraising experience for new projects, while also providing investors with access to new and promising investment opportunities.

Multi-chain Wallet: Balance Network offers a multi-chain wallet for users' web3 experience. These include mobile wallets and browser extension.

3- TOKEN USE CASES

The BLN token is a utility token used on the Balance Network platform. The token has a variety of use cases, including:

Centralized Exchange: BLN tokens are used for commission payments and trading fee discounts on the centralized exchange.

DeFi Protocols: BLN tokens are used for yield farming and liquidity provision on the Balance Network DEX.

Launchpad: BLN tokens are used for determining which tier user is in and let users have more allocation according to their tiers, which increases with the amount of BLN tokens user holds.

NFT Marketplace: BLN tokens are used for NFT Staking and loyalty points on the NFT marketplace.

4- TOKEN SUPPLY

The total supply of BLN tokens is 200 million. The tokens will be released in a predetermined rate and process.
